DETAILED ACTION

Response to Remarks

1. Applicants' arguments, filed on 1/22/07, have been approved and entered. They have been fully considered. Rejections and/or objections not reiterated from previous office actions are hereby withdrawn. The following rejections and/or objections are either newly applied or reiterated. They constitute the complete set presently being applied to the instant application.

Claim Rejections - 35 USC § 102/103

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-4, 8-15, 58-60 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Bonfils et al. (Tetrahedron Letters, Vol. 32, pp. 3053-3056, 1991).

Bonfils discloses organic molecules bearing a disulfide function and hydrocarbyl moieties. Page 3055 shows for example compound 12, where the organic molecule is a nucleotide, and the hydrocarbyl is a pyridinyl. Compound 19, for example, shows an organic molecule which is a pyridinyl, and an hydrocarbyl which comprises a fluorescent labeling group.

5. Claim 1 has added functions which the prior art has not analyzed “wherein cleavage of the disulfite bonds produces a free hydroxyl”; but given the above 102 rejection analysis substantiating the basic characterization of the composition of the invention being the same as the reference, these added characteristics are presumed to be inherent in the prior art composition.

As it is pointed in *In re Fitzgerald* (205 USPQ), page 594, 2nd col., 1st full paragraph, supports the shifting of the burden of proof to the applicant that the instantly claimed invention is novel and unobvious over the prior art. The specification discloses that reducing the disulfite using a reducing agent, creates an intermediate which decomposes to produce a free hydroxyl (page 16, lines 10-20).

Since both the prior art and the instant application prepare and use composition which appeared to be identical, the prior art therefore suggests that the composition therein disclosed will be able to create a free hydroxyl when reduced using a reducing agent, therefore suggesting the instant application under 35 U.S.C. § 103(a).

6. Claims 16-24 are allowed.

Art Unit: 1637

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for response to this final action is set to expire **THREE MONTHS** from the date of this action. In the event a first response is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event will the statutory period for response expire later than **SIX MONTHS** from the date of this final action.
